

Setting up ELearning programmes at Higher Educational Institutions: A case of University of Professional Studies, Accra (UPSA)

It is recognized that ICT, can help address a number of challenges present in the Higher Educational sector such as the provision of appropriate ICT facilities (infrastructure, skilled human resources, content etc.) and can significantly address issues related to quality, access and management

The Ghana Education Reforms launched in June 2007 call for the introduction of Information and Communication Technologies (ICTs) at both Senior High Schools at Higher Educational Institutions. Many Higher Educational institutions have introduced Distance Learning Programmes. One of such Institutions is University of Professional Studies, Accra (UPSA).

UPSA is in process of introducing blended learning type of mode. Developing online learning materials are daunting tasks. The webinar will take participants through how to put in place formidable system to develop online course materials for the learners and how to set up online learning system.
